Viska (Sijia) Wei 韦思嘉

EDU & Internships:

Berkeley （2012-2017) - Physics
UChicago（2017-2019) - Particle Pheno
JHU (2019-2025) - Physics Informed AI
JP Morgan, ByteDance - LLM Researcher

LLM Researcher
ByteDance · Internship
May 2024 - Aug 2024 · 4 mos
San Jose, California, United States · On-site

1. Built a next-generation model-as-a-service platform, supporting hundreds of LLM-based applications.
2. Developed and maintained the platform, covering offline training/finetuning, online inference, model management, and resource orchestration.
3. Implemented Automatic Prompt Optimization strategies and integrated Argilla for enhanced data processing.
4. Researched 60+ prompting and agent techniques (e.g., AutoPrompt, RL-GPT, OIRL, OPRO) and authored technical documents with 200+ team views.

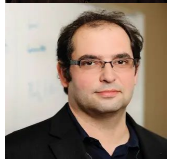
AI/ML Researcher
JPMorgan Chase & Co. · Internship
Jun 2023 - Aug 2023 · 3 mos
New York City Metropolitan Area · On-site

Major contribution to (1) Model design, coding, training and testing. (2) Workshop and tutorial creation for conceptual (NLP/LLM, ML/AI, InstructGPT) and practical (AWS, Pytorch) education.

1. Developed scalable sanction screening models based on large language models (RoBERTa, T5, Flan, Falcon-instruct, and GPT) that out-perform human operators, saving $20M in labor cost per year.
2. Utilizing efficient fine-tune techniques (quantization) and adapters (LoRA) to overcome GPU barriers, results in affordable and efficient development cycle that saves $2.6M per tasks per year.
3. Lectured on NLP/AI. Tech support on AWS, git, conda, and LLM libraries (trl, transformers).

Thesis Advisors & Research:

Pheno: Prof. Carlos Wagner
Phy: Prof. Alex Szalay
CS: Prof. Vova Braverman
Math: Dr. Sergey Kushnarev



Bounding the charm Yukawa coupling
NM Coyle, CEM Wagner, V Wei
Physical Review D 100 (7), 073013

A UMAP-based clustering method for multi-scale damage analysis of laminates
D Yang, V Wei, Z Jin, Z Yang, X Chen
Applied Mathematical Modelling 111, 78-93

Symmetric Norm Estimation and Regression on Sliding Windows
V Braverman, V Wei, S Zhou
COCOON 2021

Sketch and Scale Geo-distributed tSNE and UMAP
V Wei, N Ivkin, V Braverman, AS Szalay
2020 IEEE International Conference on Big Data (Big Data), 996-1003

Multiscale modelling for fatigue crack propagation of notched laminates using the UMAP clustering algorithm
D Yang, M Ma, V Wei, J Li, J Zhou, X Song, Z Guan, X Chen
Thin-Walled Structures 199, 111819

Tech Background - Graduate Level Courses:

PHYSICS	212	NONEQUIL STAT PHYS	4.0	4.0	A-
